QUERÉTARO, MEXICO 2016

ROME, ITALY 2018

1st INTERNATIONAL CONGRESS OF THE WORLD DEAF TECH QUERÉTARO, MEXICO 2016

The 1st Deaf Tech International Congress was held in Mexico from November 25 to 27, 2016, with the theme of inclusion and technological innovations. Our organization, together with World Deaf Tech, managed to organize a very successful event, which received excellent reviews from the participants, totaling approximately 150 people. In addition, this event was possible thanks to the generous sponsorship of national and international companies. We had the participation of professionals with extensive curriculum and experience in the technology sector, as well as interpreters of Mexican Sign Language and International Sign Language, providing simultaneous translation into Spanish and English. I would also like to inform you that one of our participants, speaker and member of the Deaf Tech team, Alfonso from Mexico, Joaquim Amado from Brazil, Jose Ignacio from Spain and Gabriele Serpi from Italy, were present during the event. They demonstrated an extremely professional attitude and genuine interest, and therefore I highly recommend them.

2nd INTERNATIONAL CONGRESS OF THE WORLD DEAF TECH ROME, ITALY 2016

The 2nd WDT Congress took place in December 2018, and World Deaf Tech, LisSubito Movement, and Innovatech invite you to join the first global conference focused on technology and its applications that promote inclusion and collaboration between deaf and hearing individuals. In the first two days, the event was held at the Istituto Statale per Sordi di Roma (ISSR) for workshops and forums with the presence of IT experts. The choice of Rome for the second edition of the WDT Congress is due to its rich evolutionary history, which has undergone many political and social changes. Additionally, Rome has recently become a model for an accessible city for deaf and physically and mentally disabled individuals, thanks to the technological efforts of the Capital of Rome. Speakers from around the world discussed this important topic. Live sign language interpretation and captioning services in Italian Sign Language were provided, which were incredible and essential for sharing information and experiences on how technology works and how it can promote development and knowledge. We extend our thanks to the speakers and all participants, including Joaquim Amado, Alfonso Balderas, and Jose, who shared information and experiences. The participation of everyone is crucial for the deaf community and for promoting social inclusion, and it has been highly effective.
